#### Introduction

The purpose of this document is to present colposcopy images which were taken by Gynocular. Magnification of 5x, 8x, 12x was applied.

The images of six patients were taken separately using: sodium chloride, acetic acid (with or without green filter), Luguls Iodine during examination. In addition, each patient's' information and diagnosis are listed above the images.

Following the diagnosis, biopsy or intervention (LEEP) presented.

# Age 30, para 1, Pos HPV, Biopsy CIN 3, LEEP CIN 3

After sodium Chloride

**Acetic Acid** 

Luguls Iodide

# Age 33, HPV pos 16, Cytologi scus, Biopsy CIN 3, LEEP CIN 2

Acetic Acid Acetic acid green light Luguls Iodide

### Age 52, Para 2, HPV Pos 18, Cytology ASCH, Biopsy CIN 1, Endocervix normal

Inspection before Sodium Chloride

Acetic acid, Green light

Luguls Iodide

# Age 30, Para 0, Cytology ASCH, Pos HPV16, Biopsy LSIL, CIN 1

After sodium Chloride Acetic Acid Acetic Acid Acetic Acid Green Light

# Age 31, Para 0, Cytology HSIL, Biopsy CIN 3, LEEP CIN 3

Acetic Acid Acetic acid Green light Luguls Iodide

# Age 30, Para 0, HPV Pos 16, Cytology ACUS, Biopsy normal, Cervicit

Inspection Acetic Acid Luguls Iodide
